Variance Justification:

In order to justify approval of any variance, the Board of Zoning Adjustment considers the following criteria. Please answer all of the following items. Use additional sheets if needed. A response of yes, no, or N/A is not acceptable.

1. Explain how the variance will not adversely affect the public health, safety or welfare.

The requested variance is compatible with both the setback and building height of the previous building expansions onsite.

2. Explain how the variance will not alter the essential character of the general vicinity.

The area is an existing industrial area and the proposed building addition will continue the established setback and building height of the existing structure onsite.

3. Explain how the variance will not cause a hazard or a nuisance to the public.

The public will not be impacted by the proposed building addition as it is located along a portion of Garland Avenue which already contains industrial uses and buildings of the same height on-site.

4. Explain how the variance will not allow an unreasonable circumvention of the requirements of the zoning regulations.

The site is currently designed with a structure shorter in height directly adjacent to 15th Street with the taller structure located toward the rear of the property along the existing railroad tracts and rail yard.

Additional consideration:

1. Explain how the variance arises from special circumstances, which do not generally apply to land in the general vicinity (please specify/identify).

The special circumstances for this site is due to the original industrial building placement and recent success of the company to continually expand at this location.

2. Explain how the strict application of the provisions of the regulation would deprive the applicant of the reasonable use of the land or would create unnecessary hardship.

Strict application of the requirements of the Land Development Code would limit the company's ability to grow at the current location.

3. Are the circumstances the result of actions of the applicant taken subsequent to the adoption of the regulation from which relief is sought?

Because the applicants continued growth and success in the marketplace could not have been predicted they did not foresee a need for a master plan for onsite expansion and was unable to avoid the needed variances.
