Cynthia,

Attached are the site plan, floor plans, and elevations of the project for the Gillespie's.

As I discussed with you on the phone, our intent is to remove the added front porch and restore the front facade, including rebuilding the door and window hoods. We would like to find a salvaged half lite front door that fills the opening up to the transom, and do the same for the existing side door facing Frankfort Ave. Windows will be retained on the front and wherever possible on the balance of the building. Siding will be repaired, scraped, and painted. The front yard will receive an improved entry porch (with no roof) and the yard will be landscaped as a garden.

There will be a 700SF footprint addition to the rear that joins the camelback portion of the building. This addition has a two story side porch that serves as access and an amenity to the leasable space. The building abuts the property line on the west side and that wall will be concrete block for fire protection. The remaining walls of the addition will be wood frame with siding to match the original building as closely as possible. The entire building will receive a new shingle roof in a slate grey color. A handicapped ramp will be added to the side entrance.

Please feel free to call with any questions. See you on Nov. 20!

Charles
