

Hello,

This letter is to advocate why Flip the Script should be granted a group house conditional permit when there is another group housing conditional permit within 1,000 feet. We screen all our clients with a detailed in-depth screening procedure. After getting the basic information a team of, licensed clinicians, therapist, nurses, and psychiatrists decide what level of care is needed and if they are a good fit for Flip the Script at all. We do this to make sure we are getting clients who want to be here and are willing to change their lives and be positive in the community. Flip the Script is monitored 24 hours a day, with staff who have over a decade of sobriety and knows what it takes and model what it looks like to be a productive member of society. Flip the Script only accepts up to 8 men and with Covid we have been keeping it at around 5 or 6. We have recently added privacy fencing and we don't allow our men to hang out in the front or outside of the gated area. The property stays clean and well-kept, and the lawn is cut weekly. We pride ourselves in providing treatment, and we are not just looking to run another boarding house but to help change lives.

Thank you

Duane Nathaniel
