The motion was made by Council Member Benson, seconded by Council Member McCraney, that this Resolution be approved.

Council Member Fowler explained that during the process of considering the 100% Renewable Energy Resolution she wanted to request a financial impact statement, which is required when the Council seeks to pass legislation that will have a cost associated with it that is not accounted for in the budget. She stated that the Jefferson County Attorney’s Office told her that she needed to do a Resolution [to amend Council Rules to allow for such request related to a Resolution]. She also mentioned that Jeff O’Brien would be addressing her concerns about the cost associated with the 100% Renewable Energy Resolution by conducting a study.

The motion carried by a voice vote and the Resolution was adopted.

Enactment No: Resolution 002-2020

***This item was moved from the Consent Calendar to Old Business>**

A motion was made by Council Member Benson, seconded by Council Member Piagentini, that this Ordinance be approved.

Council Member Yates explained that this Ordinance is to approve Metro Government co-signing on a bond for Norton, that Norton's assets exceed what is needed to cover the bond, and that it benefits Louisville Metro by having an investment in a major local hospital.

Council Member Parker explained that she would be abstaining to avoid a conflict of interest as she is an employee of Norton.

Council Member Fox explained that he too would be abstaining because his daughter works for Norton.

The motion carried by the following vote and the Ordinance passed:

A motion was made by Council Member Benson, seconded by Council Member Dorsey, that this amended Resolution be approved.

Council Member Fowler stated that she had an Amendment by Substitution to include three additional contracts for the following golf courses:

- Contract to Grant Hummel - Sun Valley Golf Course**
- Contract for Patrick Vadden - Vettiner Golf Course**

-Contract for T Betz Golf - Long Run Golf Course

A motion to amend by substitution was made by Council Member Fowler, seconded by Council Member Benson.

Council Member Winkler thanked Council Member Fowler for her work on this.

Council Member Fox thanked Council Member Fowler for her work on this. He stated that the mission was to save golf while achieving revenue neutrality and avoid drawing from the general fund, that he was proud that it was a bi-partisan effort between Council Member Fowler, Council Member Peden, Council Member Kramer and himself, and that the Council and Administration worked together to get to this point.

Council Member Kramer provided some background history since he became involved in this subject when the Mayor provided no funding for golf courses in the budget last year and planned to hire an outside entity to manage the courses. He stated that unlike the closing of pools and libraries and the cancellation of police recruit classes, this was one plan the Mayor shared in advance and the Council made it clear that they were not interested in the plan nor were they interested in the suggestion that some of the golf courses be closed. He further explained that as the Administration took heed of the Council's concerns and considered other options, they struggled with how to contract with golf professionals in a way that would be consistent with the Ordinances passed by the Council. He explained two outstanding concerns he had regarding the the Council not being informed of how the process would work until after the Administration had completed it, and how there were still three other golf courses that did not have contracts and therefore will have to be ran by Metro Parks. He related his budget concerns surrounding the Middletown Library to this topic and spoke of possible closures for the three golf courses without contracts. He stated his concern that by accepting contracts for six of the golf courses the Administration may come back in a few months and say they cannot find pros for the other three golf courses and that they are too expensive to run, and the Council will be asked to accept that golf is an amenity the city cannot afford. He stated that he was struggling with his vote because a 'yes' vote may mean that the three 9-hole golf courses will go and a 'no' vote may mean that all of the golf courses are in danger.

Council Member Hollander clarified that the Council did not add money in the budget for golf courses and the amount proposed by the Mayor remained the same. He stated that there was an Ordinance that required golf courses without pros to be run by Metro Parks and that there was no time limit on how long they were to run such courses, and that there was another Ordinance that says no golf course can be closed or repurposed without the affirmative vote of the Council. He stated that turning down six good contracts for golf courses because the Council was mad about not having three other contracts in place is a bad idea as there are safeguards to protect the three golf courses without contracts.

Council Member Yates thank Council Member Fowler for here work on this. He spoke about the Bobby Nichols golf course and stated that it would take a majority vote of the Council to close it. He stated that he was meeting with an economic development team to find incentives to make the golf course more attractive because he sees golf not just as a game but as part of the

community, and that such amenities protect the intergrity of the neighborhoods around it. He explained that his top priorities were public safety and infrastructure, but that other amenities are needed to make Louisville a great place so that the city can attract the top talent which in turn allows the city to reinvest in public safety and infrastructure.

Council Member Fowler spoke about how events like golf scrambles bring communities together and stated that she too would fight to keep the Bobby Nichols golf course from closing. She thanked those at Metro Parks and those in the purchasing department regarding the negotiations of the contracts, and noted that the percentages the pros were getting is not much different from what they were getting before and that between \$3,000 and \$5,000 on average is what the city will realize per course. She thanked the Council for their work on changing the golf fees at the end of last year to create more revenue. She then spoke about the problems she had with the selection process for the pros, and how some of the applicants who had put 40+ years of work in to helping run the golf courses were disrespected during the process.

Council Member Sexton Smith stated that though the path was difficult she is in favor of this and spoke about the nine core values taught by the First Tee program. She also stated that though everyone will not get what they want, the good decision they make now is better than waiting for a perfect decision tomorrow.

A motion was made by Council Member Flood, seconded by Council Member Triplett, to invoke Rule 5.11(e) to limit debate on the proposed Amendment by Substitution. The motion carried with a voice vote.

Council Member Piagentini stated that he would be voting for this because he believed from the discussion here that the three golf courses will be protected. He also stated that the Council was not supportive of how the process worked and that he hopes the Administration understands the Council's intent, is more respectful of all employees, and provides a level of certainty during turbulent times.

Council Member Kramer clarified his previous statements in regards to comments made by others.

Council Member Fowler stated that the profits from golf were up at least 20 percent since July, and that any profit realized from golf would go back into golf courses and that she will be making an amendment regarding such. She then asked that Hollie Hopkins, Jefferson County Attorney's Office, explain the current Golf Ordinance regarding selling or repurposing golf courses and what it means in regards to the three 9-hole golf courses without contracts at this time.

Hollie Hopkins gave a summary of the Ordinance, and Council Member Hollander read the Ordinance regarding the process necessary to close or repurpose a golf course.

Council Member Kramer asked Council President James if he had recieved any assuances from the Administration that they would get contracts for the last three courses, and Council President James stated that he had not recieved any such assurances. Council Member Kramer asked whether

Council Member Fowler, Council Member Fox, or Council Member Peden had received any such assurances, and Council Member Fowler explained that she had asked the Jefferson County Attorney's Office if any action taken now would prohibit the three golf courses without contracts from getting contracts and she was assured that they were not prohibiting such. She further stated that the RFP process ends if the contracts are approved this evening and she asked the Jefferson County Attorney's Office if someone could tell them how the process would work regarding contracts for the last three golf courses. Hollie Hopkins explained that there are various mechanisms in the procurement code regarding entering into a contract and that there is no requirement that a particular mechanism be used in this case.

Council Member Kramer stated that his concern was that Metro Parks will be running the three golf courses and whether they will hire pros for those golf courses or instead find a way to have the courses closed. He stated that he wanted to protect all of the golf courses and that he either wanted an assurance from the Administration that they will get pros for the three golf courses or an assurance from his colleagues that they will not settle for having only the six golf courses and decide it is the best they can do. Council Member Fowler responded that she plans to introduce legislation that makes it easier to get contracts for the last three golf courses.

Council Member Ackerson stated that the Council is only considering six contracts in regards to this legislation, and that they were not there to debate about golf or to make commitments regarding golf course closures or golf revenues, and that those discussions should be held at the Parks and Sustainability Committee meeting.

A motion was made by Council Member Ackerson, seconded by Council Member Yates, to Call the Question. Council Member Kramer objected.

Council Member Winkler stated that he agreed with Council Member Ackerson and added that the Administration had provided a contract for one of the 9-hole golf courses that was not accepted and that it was an act of good faith. He stated that the six contracts before them were the only things being considered now and that approving them is the only thing that assures that the six golf courses have contracts.

Council Member Fowler spoke about the one 9-hole golf course contract that was not signed by the contractor due to some of the provisions not being negotiated by the full team, and that going forward she hopes that they do not forget about that contractor.

Council Member Ackerson reiterated his motion to Call the Question. Council President James called for a voice vote and a voice vote was taken. Council Member Kramer objected and suggested that the Rule be read. Council Member Hollander stated that there was no one else in the cue and that it appeared that everyone was ready to vote and Council President James agreed. Council President James explained that the voice vote to Call the Question was in the affirmative and that now they were going to vote on the Amendment by Substitution.

Council Member Kramer explained his vote and stated that he believes that the vote on this legislation does concern what happens to the three golf

courses that do not have contracts, and that there are no assurances that the Administration will commit to the future of these golf courses.

The motion to approve the Amendment by Substitution carried by the following vote:

Yes: 22 - Green, Dorsey, Sexton Smith, Purvis, James, McCraney, Coan, Hollander, Mulvihill, Blackwell, Fox, Fowler, Triplett, Reed, Winkler, Parker, Piagentini, George, Peden, Flood, Yates and Ackerson

A motion was made by Council Member Triplett, seconded by Council Member Winkler, that this Resolution be approved.

Council Member Fowler explained that this was the second Resolution considered regarding this topic. She stated that this was a Resolution that was not binding but it was a step in the right direction for getting sustainable renewable energy for the city. She also stated that she still had concerns about how it will be funded.

Council Member Coan stated that he had worked with others for more than a year to get the Resolution into a more practicable form, to realign some of the goals, and to reorder some of the goals to put Metro Government first in terms of leading by example. He stated that there was a public hearing and they heard from advocates, representatives of the Louisville Gas and Electric Company, and the Energy Manager from Cincinnati. He mentioned the concerns some people had regarding the cost and that figuring the cost was not simple math, especially with changes in technology, the markets, and the environment over the next 5-10 years. He stated that there were several amendments made, and he pointed out the most recent amendment made at the special Parks and Sustainability Committee meeting the previous week. He explained the three steps that Jeff O'Brien, Develop Louisville, went over at the Committee meeting, which include the following: conduct an energy audit of Metro Government operations; with the savings anticipated from the energy audit, hire an energy manager that will closely monitor the energy bills; and with the additional anticipated savings, send out a RFP for a conversion study. He stated that he did not feel the need to debate climate change, and that the passage of this Resolution would not solve all of the problems but that it would be a start in the right direction. He finished by urging the Council to support this Resolution.

Council Member George spoke about the reasons she joined as a co-sponsor

on the legislation. She stated that she wanted the future of the city to be one that works proactively to make essential investments that yield long-term savings. She also urged the Council to support the Resolution.

Council Member Piagentini stated that if the Resolution only consisted of Sections 2 and 3, he'd be inclined to vote for it. He further stated that the goal in Section 1 of net zero or net positive energy, water, and waste would be very expensive to accomplish and that it would hinder development, especially in under-developed communities. He stated that he realized that climate change is real and that they should be stewards and move in that direction, but he cannot support mandating changes to the building codes that require the city to meet these goals within 10 years and private citizens and business within 20 years. He stated that he would vote against this and urged the Council to vote against this Resolution. And he stated that, in regards to Resolutions not being binding, there have been Resolutions that have cost the city millions of dollars, such as the millions of dollars provided for the Affordable Housing Trust which started as a Resolution. He concluded by stating that this Resolution moves resources and Section 1 is unchartered territory and he cannot support such without a roadmap.

Council Member Parker stated that she wanted to preempt her statement by noting that she voluntarily does many things to be conservative when it comes to the environment. She stated that the 100 percent goal and the 10-year timeline are not rational or achievable. She stated concerns she had about hiring an energy manager with a high salary; the millions of dollars in savings that were to be realized and how it was not actually savings but monies that will be provided by federal grants; and a study done by the University of Maryland that showed that solar farms create a heat island effect. She stated that she would not be supporting this Resolution because it will be held over their heads; it will create new regulations, new costs, and new taxes for the private sector; it will also slow business growth and residents will leave; and housing will not be affordable with the additional costs of retrofitting homes. She stated that next would be the rationing of water, limiting the amount of garbage produced and charging more for going over the limit, and she questioned where the regulation would end.

A motion was made by Council Member Winkler, seconded by Council Member Flood, to invoke Rule 5.11(e) to limit debate. The motion carried by a voice vote.

Council Member Winkler stated that the Resolution only had time bound elements around the clean electricity goal, clean energy goal, and clean energy community-wide goal, and does not have time bounds in regards to moving to 100 percent net positive waste and water. He stated that there was also no time bound element regarding the building codes and that instead it sets a standard that the city should strive to achieve. He stated that the way to move forward is with ambitious goals. He stated that people and businesses already pay for the impacts of climate change as part of costs for things like health insurance and flood protection systems. He stated that, when asked in the future by his children, he wanted to be able to say to them that he took action regarding this issue when he had the chance. He urged support for this Resolution not only by the Council, but by the entire community.

Council Member Reed stated that he could not support anything without

knowing what the cost would be and that he would be interested in doing the conservation audit and then revisit this issue. He stated that he appreciated that everyone wants clean energy and a clean environment, but the private sector will ultimately do what is in their best interest from a cost standpoint. He concluded by stating that he would be a 'no' vote.

Council Member Hollander stated that this city was not the only one facing these decisions, that there are cities all over the country and major corporations that are saying they have to take action. He also stated that when he is asked in the future what he did when the climate crisis came, he was not willing to say that he did nothing because it was too hard, and that he would be a 'yes' vote on this.

Council Member Coan addressed statements made by others that were incorrect and he explained the goals in the Resolution.

Council Member Yates stated that he worried about the non-binding nature of the Resolution because it may tell the public that the Council is doing something they are not. He stated that this Resolution asserts that the Council supports a goal for the future and nothing more, and that the Council is limited with what they can do in local government. He also made a statement about what it means to make a goal of 100 percent achievement.

A motion was made by Council Member Yates, seconded by Council Member Flood, to Call the Question. The motion carried by the following vote:

Yes: 16 - Dorsey, Sexton Smith, Purvis, James, McCraney, Coan, Hollander, Blackwell, Fox, Fowler, Triplett, Reed, George, Flood, Yates and Ackerson

No: 5 - Mulvihill, Kramer, Winkler, Parker and Piagentini

Absent: 5 - Green, Shanklin, Benson, Engel and Peden

Enactment No: Resolution 009-2020

Council Member McCraney asked whether the previous vote achieved a two-thirds majority and for clarity on what was currently before the Council for a vote.

Council Member Mulvihill explained that he would be abstaining due to his wife's employment with LG&E.

Council President James explained that he would be abstaining due to his wife's employment with a company that works with LG&E.

A motion to approve carried by the following vote and the Resolution was adopted:
