

David Yates May Disqualify as County Clerk

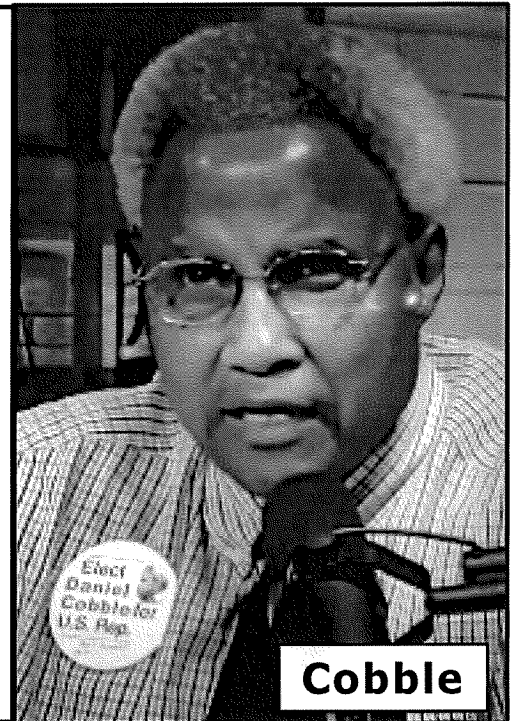

– Does Mayor Greenberg Have an 80% Approval Rating?

– The **Office of Infrastructure** Will Save \$Billions in Tax Dollars

Council Members,

For full disclosure, I am Daniel Cobble running for U.S. Representative here in Louisville District 3. I have three quick points. First, Secretary of State Michael Adams and Interim Jefferson County Clerk David Yates are once again violating §147 and §148 of the KY Const. that bars county and State officials from conducting elections. These

A high stakes election for Jefferson County voters. They must choose “corruption as usual” or Mr. Cobble’s agenda for reversing bad and unlawful policies.

1891 central provisions eliminate the conflicts-of-interest where Gov't officials have the interest in putting whom they want in office. **You have copy of my April 30, 2026 pleading in court demanding that Clerk Yates keeps CLOSED & SEALED all early voting and mail-in ballots until delivered on Election Day to the Precinct Captains in the precincts where these voters live.**

Next, one of the Mayoral candidates says the Mayor Greenberg camp is claiming Greenberg has an 80% approval rating. This is not possible and exemplifies my concern that Clerk Yates will cheat to get Greenberg back in office. His office is no longer taking phone calls that are directed to 311 City Call, and he stopped the tradition of people dropping off information to the Mayor's office. Thus, he is confident he will get back in.

The Office of Infrastructure: And finally, as you know on April 3, the KY legislature approved \$1 billion to Mayor Greenberg on top of the \$1.6 billion budget that you approved. Shortly afterwards, misappropriations of the \$1 billion began. One is

the \$500,000 for reducing crime. For, Gov't knows well it's the absence of fathers that leads to crime and yet you won't promote fatherhood. That's why if I make it to Washington, I will push for the **Office of Infrastructure (OI)** at the three level of gov't. The OI will eliminate block grants by requiring a **Proposal for the Project** with a **Summary Plan & Balance Sheet**. The Balance Sheet will minimize corruption & waste by allowing taxpayers to track the spending.

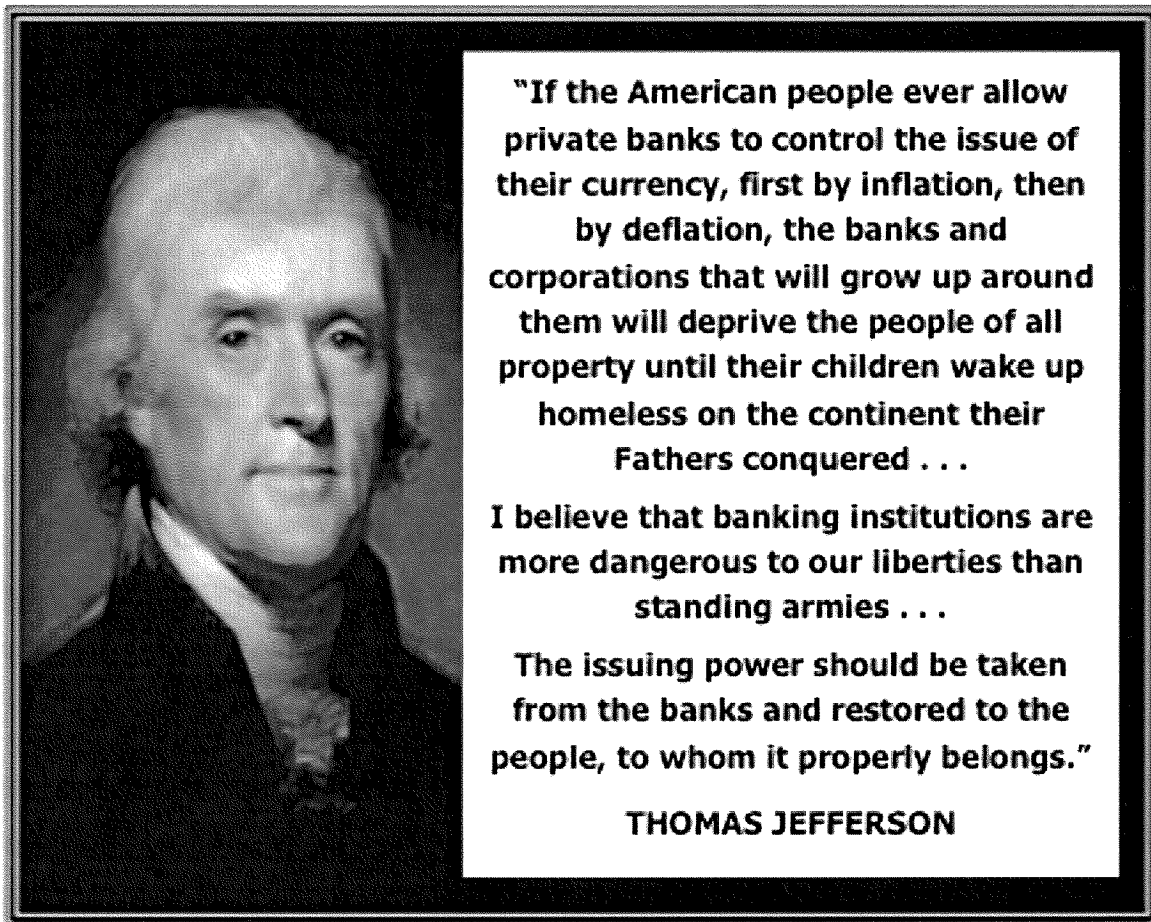

Thank you.

Daniel Cobble, Founder of T.P.A.P.

TWO ATTACHMENTS

• **MOTION FOR EARLY VOTING TO ENFORCE §147 & §148 OF KY CONST.**

– County Clerk David Yates is ignoring the March 26, 2026 letter of instructions for §148; any election fraud disqualifies Yates for the May 19 election for County Clerk –

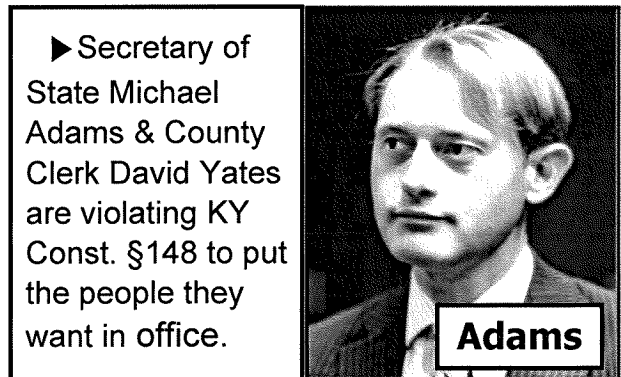

– Young voters in Jefferson County want fair & legal elections –

A. §148 bars County & State personnel from operating elections –

B. Early voting & mail-in ballots must remain sealed until delivered to the Precinct Captain in the precinct where the voters live –

1. Now comes Plaintiff Daniel Cobble to give Notice that County Clerk David Yates is disqualifying himself for “elected County Clerk” in the 2026 primary election. Yates is currently the “interim” County Clerk (unelected & temporary) running in the May 19, 2026 primary election to become the “elected” County Clerk.

2. **Background.** Mr. Cobble filed this lawsuit on Sept. 29, 2023 to resolve the continuing problems with voting in Kentucky that disenfranchises the voters. In recent years, the

Secretary of State and Jefferson County clerks have not enforced §147 and §148 of the Kentucky Constitution. Provision §147 requires all ballots to remain private so that gov’t officials shall not know who is casting the ballot. However mail-in ballots are not kept private as the current election process

informs gov't officials of the identity of the voter casting the mail-in ballot. Then, §148 requires all election officers (**poll workers**) to only operate the precinct where they live, their residence. And thus, §148 bars county & State officials from conducting elections. But this is not occurring; **the current structure of early voting** allows precinct officers to work outside their precincts of residence, and county and State officials join in conducting the elections. — §148's requirement of voting only within the voter's precinct of residence facilitates fast and accurate audits of elections. **Proper and timely audits are not possible when voters vote outside their precincts.**

3. To wit, §148 so states:

“ . . . all officers of any election shall be residents and voters in the precinct in which they act (operate).”

4. **Purpose.** The purpose of Provisions §147 and §148 is to **prevent conflicts-of-interest between voters and gov't officials.** For example, Mr. Cobble charges in this lawsuit that Gov't officials cheated in the 2022 election cycle (and in 2024) that disenfranchised voters. Gov't officials have an interest in cheating to get re-elected. **Today**, Mr. Cobble charges that Metro Louisville is conducting unlawful taxation and illegal confidential business practices that prevents tending to the needs of citizens.

5. **Attachment 1** is the county clerk's list of early voting locations that violate §148. **1)** Clerk Yates is allowing voters to vote outside their precincts, and **2)** county and State officials will join in conducting the early elections. **Attachment 2** is Mr. Cobble's March 28, 2026 “instruction letter” to Clerk Yates. The few early voting locations (twenty-four) is self-evident that Clerk Yates intends for county and State officials to count the votes, an illegal and material conflict-of-interest. And whereby, **Mr. Cobble demands\motions for counting votes** the instruction letter's “interim remedy” of keeping all ballots sealed during Early Voting until delivered to- and opened by the Precinct Captain on Election Day of the precincts of the respective residences of voters.

And wherefore, the herein Motion is respectfully submitted,

Daniel Cobble, Petitioner\Plaintiff

Re: Please Correct Voting for the May 19, 2026 Primary Election -

• SUMMON PRECINCT OFFICERS (POLL WORKERS) AS SOLUTION TO SHORTAGE -

**• §148 OF KY CONST. REQUIRES PRECINCT OFFICERS TO WORK IN THEIR
PRECINCTS & BARS COUNTY & STATE OFFICIALS AS PRECINCT OFFICERS -**

Dear Clerk Yates and Chairmen Fitzpatrick & Gatti,

Please correct Clerk Yates' flyer information (**attached & marked-up**) that incorrectly specifies that **poll workers (precinct officers)** can work outside the precincts where they live. But to the contrary, **§148 of the KY Const.** states that precinct officers can only work **in** the precinct where they live.

To wit, §148 so states:

“ . . . all officers of any election shall be residents and voters in the precinct in which they act (operate). ”

County and State officials are not allowed to handle\count the votes. And, of course, §148 implies that voters must vote within their precinct of residence; they cannot vote outside their precincts. (**Voting in your precinct ensures prompt and accurate audits of vote counts.**)

§148 also implies that **mail-in** and **early-voting ballots** must remain sealed\un-open until delivered to their **precinct of residence** on Election Day, to be opened by the Precinct Captain.

§148 of the KY Constitution (1891) requires only precinct officers (poll workers) to conduct elections that live in the precinct that they operate. **To prevent conflicts-of-interest, county and State officials are not allowed to handle\count votes.**

With your office paying \$299 per day, the solution to having enough precinct officers is to summon the registered voters as needed that reside in the respective precincts; the same county clerk summoning powers for jury duty.

• **The significance of 1974 KRS 117.055 for precinct officers**

Clerk Yates, as you well know in accordance with 1974 KRS 117.055, you must divide Jefferson County into precincts with no more than 700 registered voters per precinct. This low amount is necessary for resident precinct officers to have the vote counts ready on Election Night. **KRS 117.055 (1974) so states:**

“Each precinct shall contain, as nearly as practicable, an equal number of voters, based on the number of registered voters in the county, not to exceed seven hundred (700) to a precinct.”

And as you well know, the KY State legislature has tampered with KRS 117.055 that no longer enables the operation KY Const. §148. 2024 is the latest amendment to distort 117.055. **So for 2026**, please apply the simple 1974 version for the required 1,168 precincts in Jefferson County so that precinct officers residing in their precincts only have 700 votes to count on Election Night.

In summary: **1)** Precinct officers\poll workers must work within their precincts of residence. **2)** All voters must vote within their respective precincts of residence; they cannot vote outside their precincts. And thus, **3) to prevent conflicts-of-interest**, KY Const. §148 bars county and State officials\personnel from conducting elections. **4)** Mail-in and early-voting ballots are to remain sealed until delivered to the Precinct Captain on Election Day in the precinct where the voter resides\lives. **5)** En-sure the county is divided into precincts with no more than 700 registered voters per precinct. And **6)** summon the election officers needed for Election Day.

Interim Clerk Yates is responding to public pressure to correct the May 19, 2026 election. But he's still falling short in protecting the rights of voters.

Interim Jefferson County Clerk David Yates

Gentlemen, your assistance in this matter is most appreciated. Feel free to contact me with any concerns. **Please conduct the 2026 elections as the bona fide Democracy that we promote to the world at-large.** Let The People's majority prevail.

Sincerely,

Daniel Cobble, U.S. Citizen

• **Full disclosure:** I am a Republican candidate for U.S. Representative for Louisville, KY District 3 in the May 19, 2026 primary race.

Mr. Cobble

Candace Owens

Tucker Carlson

Jefferson County Voters, Help Prevent Nuclear War

Donald Trump went to war with Iran while warned the U.S. & Israel would run out of missiles. This pre-guarantee to lose the war conventionally is evidence that they're planning a nuclear attack on Iran. Candace Owens and Tucker Carlson are criticizing Trump but falling short of demanding removing him from office. This demand from Jefferson County voters will quickly spread throughout Kentucky and then the nation. Your protests leading to LG&E to refund ratepayers from the smart-meter scam prove The People have the power. So please demand from your elected officials to remove Trump and to withdraw from this unprovoked war.

Thank you.

To Voters re: LG&E

Dear Jefferson County Voters,

It was my work identifying the LG&E smart-meter scam, and that got LG&E to start refunding ratepayers. These are two more reasons for you to elect me as U.S. Representative, District 3 for Jefferson County. As U.S. Rep., I will have the national platform to push Gov't to negotiate the unfinished business with LG&E of which I have already presented to you (**see online**). These include the unlawful AI data centers.

And many of you know my other bread-&-butter issues ignored by both Democrat and Republican leaderships: healthcare, no-fee public childcare, education, the mechanics of affordability, the cause of high taxes, fatherhood, pollution, and other crises.

And so, to overcome the unresolved, corrupted voting in Jefferson County, I need the help of ALL Republicans, Democrats, and Independents to spread the word for a heavy turnout for me on **May 19**.

Thank you so much. — *Daniel Cobble* (Republican)

Petition-letter for Fair, Legal Elections by Enforcing §147 & §148 of the KY Constitution

Ref. Case 23-ci-6012, Jefferson County Circuit Court

Dear Elected Official,

(Mail \ email to the Court, County Clerk David Yates, Mayor Greenberg,
Your Metro Councilman, State legislators, and Governor Beshear)

- A)** Please enforce **§147** and **§148** of the KY Constitution. **§147 requires** all ballots to be confidential so that Gov't officials not know who is casting the ballot. These include mail-in ballots.
- B)** To avoid conflicts-of-interest, **§148 requires** all officers in elections (poll workers) to be residents and voters in the precinct in which they operate. County and State officials **cannot** be poll workers, **and voters cannot vote outside their precincts.**
- C)** Because Clerk Yates' **current early voting** does not comply with §147 or §148, please keep all early ballots and mail-in ballots sealed until, **on Election Day**, delivered to- and opened by the Precinct Captains of the precincts where the voters live\reside.

– Thank you,

My initials _____

INSTRUCTIONS: Organize, copy \ scan, share, & mail-out this Petition-letter until we prevail.

Or prepare a letter in your own words. (Don't forget to copy & share it with others.)

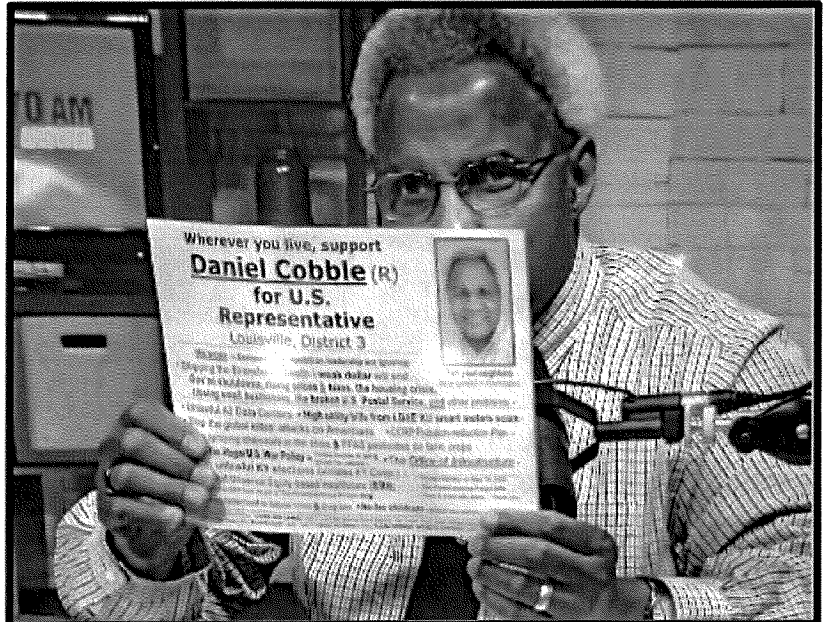

Your participation, however much, will help to protect our elections.

The-Protect-America-Project.INFO & .ORG

RE: Reducing Property Taxes while Restructuring JCPS

JCPS Board Members,

For full disclosure, I am running for U.S. Representative here in Louisville's District 3. I have three quick points to make. First, when a local employee told me that Gov't is taking **1/2** of his paycheck, I had to once again write-up why this is happening. You have copy of my April 28 Statement to Kentuckians for Freedom, **also online**, explaining the **circular debt trap** that keeps our taxes rising. Until busting up this mechanism, our economy will continue to deteriorate. Attachment 3 to the Statement **lists the history of the three antitrust violations** that are causing this problem. Gov. Beshear and the Louisville Metro Council, Etc, understand this problem but won't confront Washington. All the while, you keep raising taxes while cutting programs. Reversing this debt trap will restore the strong U.S. dollar that will actually require reducing taxes. Once elected, if I start confronting Congress before you do, then all of you should resign from office.

On WBNA-TV 21, Cobble again points out why Gov't keeps asking for more taxes. And he said Gov't cannot legally justify Open AI data centers where China's Deepseek AI will be virtually no cost to taxpayers. Deepseek will allow Open AI to become profitable that's now a sinking ship losing \$billions. See on Youtube.

Next, **on its face**, the \$189 million JCPS budget shortfall is a **criminal cover-up** that began when Marty Polio was superintendent. **It requires a combined audit** by State Auditor Allison Ball and an independent CPA.

And finally, if elected U.S. Representative in November, I will put forth a restructuring plan for JCPS. It will be much lower cost and guaranteed success for each school by being **parent-teacher centric**. It will eliminate the intentionally high cost of the administratively "top-heavy" system that you operate today.

Thank you.

C/c: DC, for Public distribution

Daniel Cobble

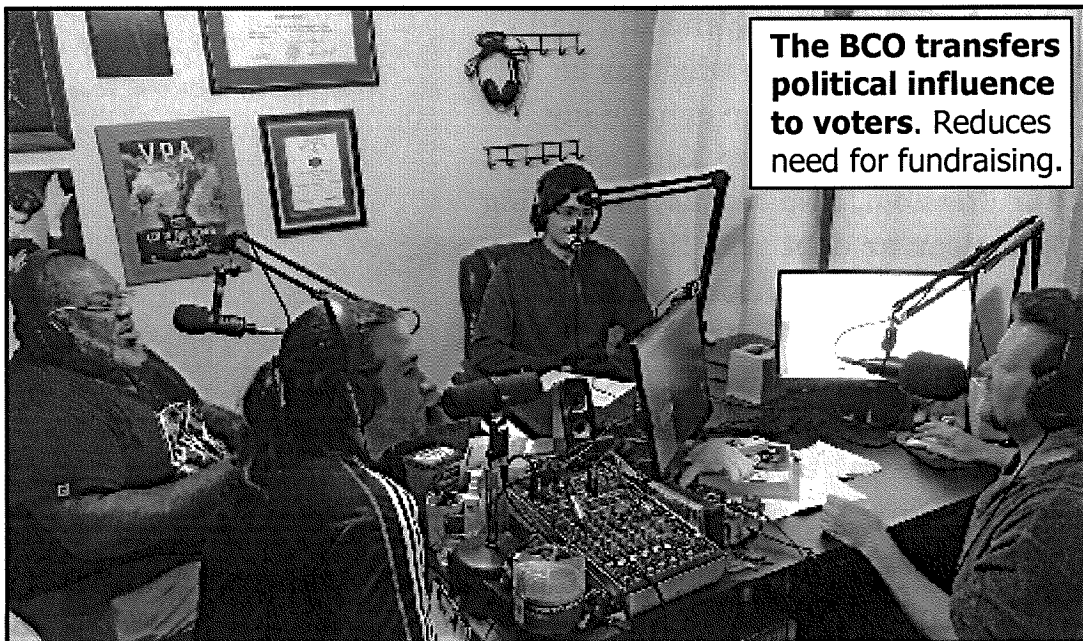

P.S. Mr. Cobble brought to the public's attention the LG&E smart meter billing scam. It got LG&E to admit it and to refund ratepayers. — REMINDER: The primary election is May 19.

What's a **Broadcast the Candidates Order (BCO)**?

- **Another reason to support lawsuit to repair KY voting -**
– So voters can identify candidates on ballots, the BCO will require all local broadcasters to broadcast all “locally registered candidates” (including write-in candidates).

The frustrations of not knowing the candidates

As usual, Cobble's argument to the Court is simple. Without a BCO, we do not have functioning democracy. The BCO idea came in 2022 when the Cobbles could not vote for judges in the general election. They did not know the names of

most on the ballot, and only saw the yard signs of others. Except for community town halls, most candidates cannot get the media exposure for voters to learn their agendas. Voters are left with guessing **or not** choosing a candidate for the particular office. **Again, this is not democracy.**

Whereby, a BCO is a “standing emergency court order” to the **FCC** (Federal Communication Commission) requiring all local radio and TV stations to broadcast all “registered local candidates” running for office (inclu. write-ins). They must broadcast each candidate for at-least 30 minutes, individually, or a maximum group of three. **The legal premise:** The public\ voters have the right to learn all candidates to make informed decisions when voting. And since the public owns the public airwaves, the FCC has jurisdiction to require the BCO “for OUR democracy to function.”

So as this matter of right, **Cobble's lawsuit, 23-ci-6012 in Jefferson County Circuit Court**, demands the BCO that must apply FCC jurisdiction across the nation. **Here are the benefits of a BCO:** **1)** All broadcasters' coverage of all candidates so voters can learn & identify them on the ballots; **2)** transfers political influence to voters; **3)** diminishes corrosive dark money in politics; **4)** reduces the need for fundraising for more space & time for elected officials to function in Gov't that **5)** improves the efficiency of Gov't; **6)** minimizes the need for taxpayer-funded campaigns; **7)** no loss of ad \$revenues as broadcasters may advertise; **8)** develops “voter interest” in the election process and knowledge of Gov't; **9)** allows elected officials to share more time with their families that eases the stress of working in Gov't (for smoother operation of Gov't). ∅

The Worsening "Trump Crisis" and

Bill Clinton said "It's the Economy, Stupid"

- Why your taxes keep rising; ending the mechanism of the un-payable "circular debt trap" -

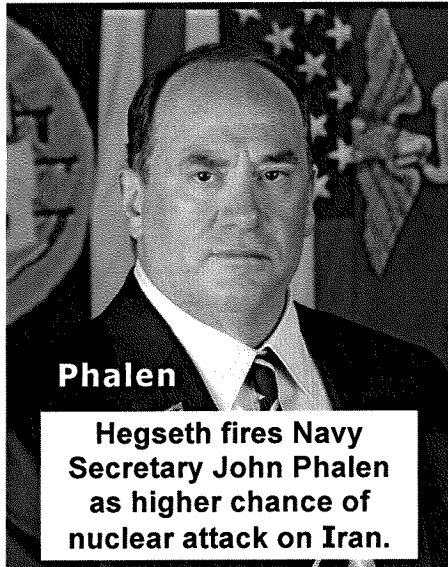

Hello Everyone,

I won't have the time to read this complete statement, and so I invite you to continue its study at home. It regards the worsening crisis of President Trump and the **circular debt trap** that keeps your taxes rising.

First, there are **three more crises** "bunched together" requiring the removal of Trump from

office. Enclosed is my two-page March 6 letter (**also online**) to Rep. Morgan McGarvey and U.S. House Speaker Mike Johnson with evidence that Trump, Hegseth, and Netanyahu are planning an **unprovoked nuclear attack on Iran**. Pursuant to my **Page 8 questionnaire comments to the National Rifle Association**, everyone agrees it's the **global elites (inclu. the Israeli gov't)** who are our real enemies (**not China and Russia**) behind the constant chaos and violence in the U.S. and the world at-large. Hence, I believe the April 22 firing of Secretary of the Navy John Phalen and the other high-level officers are in preparation for a nuclear attack. **Next**, the Trump Administration, via FBI Director Kash Patel, is attempting to wrongfully prosecute Tyler Robinson, **for the death penalty**, for the murder of Charlie Kirk. Prosecutors are refusing to turnover evidence to Robinson's defense team of which it's apparent they don't have the evidence to prosecute Robinson, requiring his release from jail. And yet there is other credible evidence that Charlie Kirk's staff, including Erika Kirk, the Israeli gov't, and U.S. military personnel were involved in killing Kirk. **It's a cover-up** by the Trump Administration.

More Americans must demand the removal of Donald Trump & END MILITARY \$AID TO ISRAEL (NEW LAW ALLOWS EXECUTION OF PALESTINEAN PRISONERS)

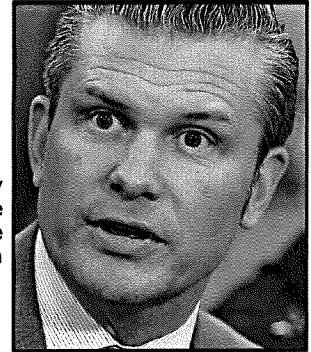

Phalen

Hegseth fires Navy Secretary John Phalen as higher chance of nuclear attack on Iran.

April 22, 2026

Secretary of Defense
Pete Hegseth

The inaction of Americans will saddle guilt for next generations. Trump distracts while Hegseth destroys the U.S. military and Wall Street pillages the nation.

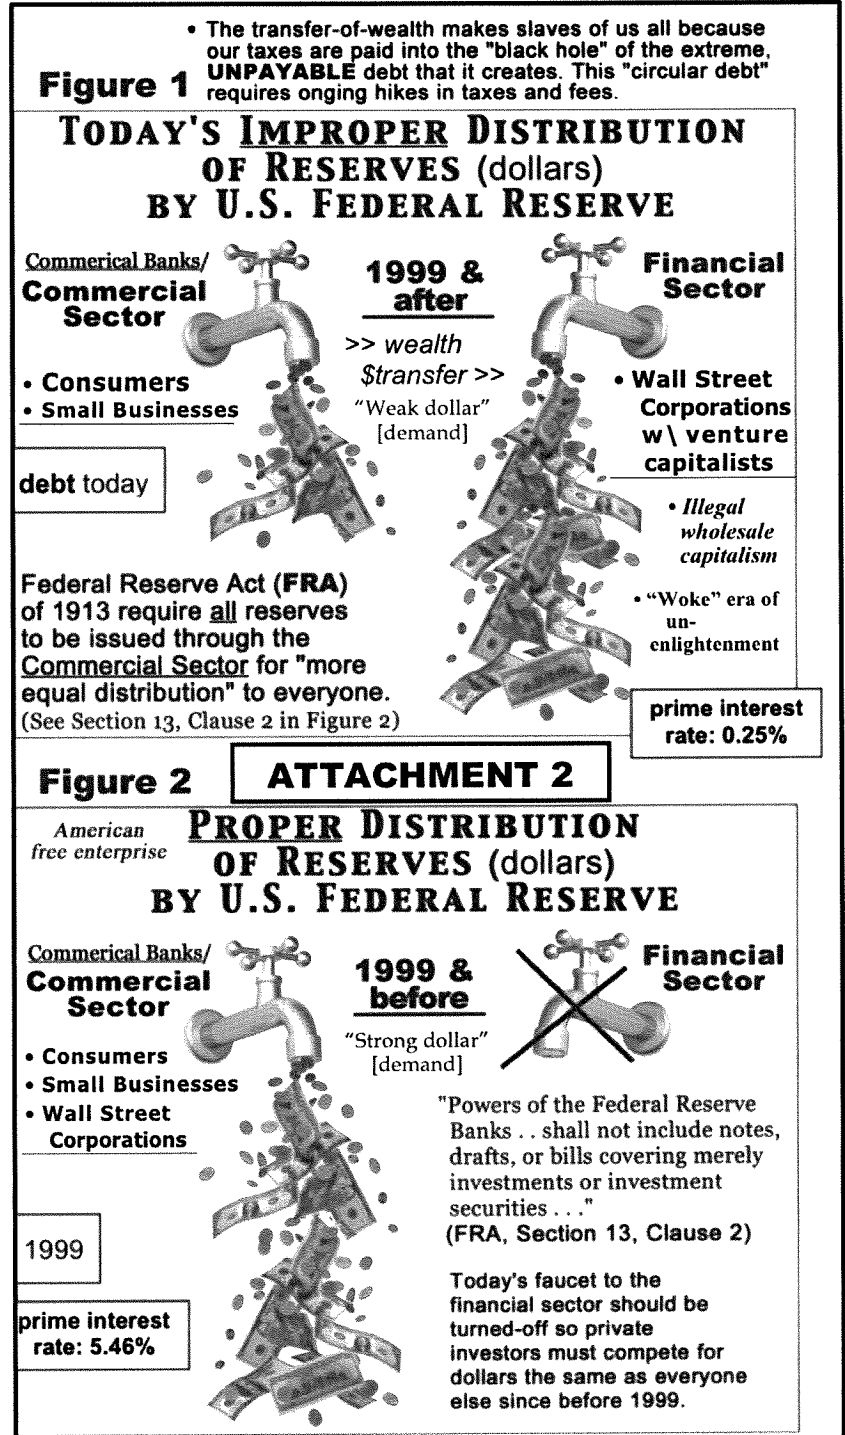

How is diagnosed mentally ill Laura Loomer a close aide to Pres. Trump?

the FBI bars her from owning a weapon. She is diagnosed with bipolar disorder, borderline personality disorder, histrionic personality disorder, and narcissistic personality disorder. First Lady Melania Trump intuitively says Loomer would be the person who would harm Trump. – **End of report.** Candace Owens says for national security, Trump’s choice of Loomer reflects his demented state of mind requiring our elected officials to intervene to remove him from office (under Amendment 25). I agree.

Next, you have my March 28, 2026 letter to County Clerk David Yates on the problems we’re still having with KY elections (also online).

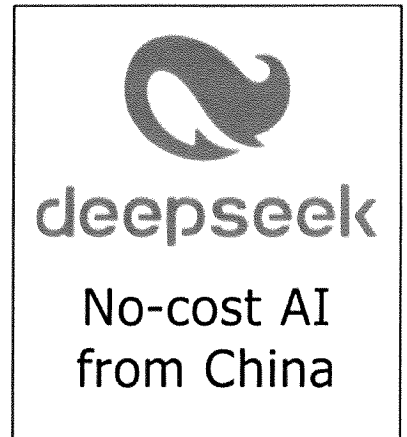

And finally, the other herein illustrations were sent to Mayor Zohran Mamdani of New York City. My Feb. 2, 2026 letter notes his failure if he raise taxes in this “weak dollar environment.” **Online at .INFO**, you can download this 24-page letter with the **July 3, 2025 court pleading** that shows Mamdani how **we restore the strong dollar so that he won’t have to raise taxes.**

And finally regarding Trump, he has endangered his Administration by choosing as a close aide diagnosed mentally ill **Laura Loomer**. Last week’s Candace Owens Podcast, episodes 327 & 328, report: Loomer was twice placed on “psychiatric hold” for attempted suicide, and

When I recently mentioned to employees at a local business that the son of a small business owner painfully complains of **1\3** of his paycheck is taken by taxes, one of the employees stated **1/2** of his check is taken in taxes. Recall just a few years ago, people complained of **1/4** of their checks being taken. Since around 2011, I have repeatedly warned Metro Gov't of what's causing this problem, the mechanism of the un-payable circular debt trap. Most people think our debt crisis is linear, i.e. we tax to pay for programs in the budget as normal, straightforward transactions. But since 1999, it's not the case. **For example**, in 2025, Metro Louisville raised taxes across-the-board by 25%. Then in Feb. 2026, they reduced public library hours from 9:00 pm to 8:00 pm, showing that Gov't will continue raising taxes while cutting programs, i.e., until stopping this circular debt mechanism. **In Figure 1 herein page 2 (Attachment 2)**, you see the **wealth \$transfer** illegally traveling from the **Commercial Sector** to the **Financial Sector**. **To compensate for the dollars transferred 1)** your taxes must increase, **2)** the debt increases, and **3)** Gov't \$borrows more, showing that these are circular transactions, going round-and-round, and not linear. For, how is it possible today that you're paying annually over \$7.3 trillion in federal taxes & fees and yet the debt keeps growing? You're caught in this loop of un-payable debt. **Prices keep rising because** Wall Street entities are using **this theft** accumulating Ocean-of-cash to buy-up everything that reduces competition (stocks, bonds, businesses, real estate, derivative & hedge fund trades, ETC, ETC). {Note: On the date of this letter, BP (British Petroleum) announced **doubling its profits in the first 2026 quarter**—the end of March, with only a month into the illegal, unnecessary war on Iran.}

Attachment 1 lists the three antitrust violations (w\ history) causing this \$transfer. When stopping them, we return to **Figure 2 herein page 2, to strong dollar [demand\distribution]**, showing all money issued by the Federal Reserve once again only goes into the **Commercial Sector**. This is what will restore the economy and U.S. tax base for return to **American free enterprise**. — Even if you're newly introduced to this circular debt mechanism, then see how each of the three violations is illegal and support reversing them. Since 1999, **Attachment 3** (Page 5 in the Mamdani letter) gives you an example of the Ocean-of-cash transferred from taxpayers. In 2022, Wall Street had a conservative estimate of \$1.2 quadrillion in derivative contracts, **not including** their other vast holdings in stocks, bonds, businesses, real estate, ETC, ETC. — And whereby, if you send me Washington, I'll have the national platform to push

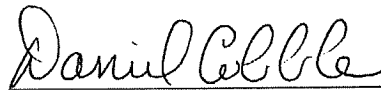

Gov't cannot legally force upon taxpayers the extreme cost of Open AI data centers but where China's Deepseek AI is NO COST (NO data centers & NO licensing). Here's another irony: Open AI is losing \$billions but would become profitable with Deepseek.

Congress to reverse these antitrust violations that would stop the tax increases and bring down your taxes. **And**, re: Page 5 w\ the July 3, 2025 court pleading, we'll have the massive tax-revenue windfall in the \$billions to further reduce taxes; because tax hikes since 1999 (**local, State & federal**) are no longer \$transferred, they will redirect into Gov'mt coffers. This overdue and organic windfall will save Social Security and Medicare.

Then, see online my November 3, 2025 letter to the KY Public Service Commission **re: LG&E\KU rate hikes** and identifying the illegalities of Open AI and its data centers. These include **China's Deepseek AI platform** that uses traditional computer chips and thus **does not require data centers for cooling** and is "open source" (**no licensing costs**). And it was I who alarmed the public of **LG&E cheating on smart meter billing** and agreeing to refund ratepayers. My Complaint at the Oct. 16, 2025 Metro Council meeting lead to the \$150 million reduction in the 2026 budget (though Council members implied program cuts). My 2022 winter work lead to MSD finally repairing the sewage basins in West Louisville. **And the list goes on.**

In conclusion, when Trump took the \$250 million from the Israelis, he became a representative of the global elites. He knew the illegal war on Iran would raise fuel prices to increase hardships. Upon restoring the strong dollar, the leadership of both parties will return to serving The People. My agenda, upon being elected, will be a mandate for Trump and Congress.

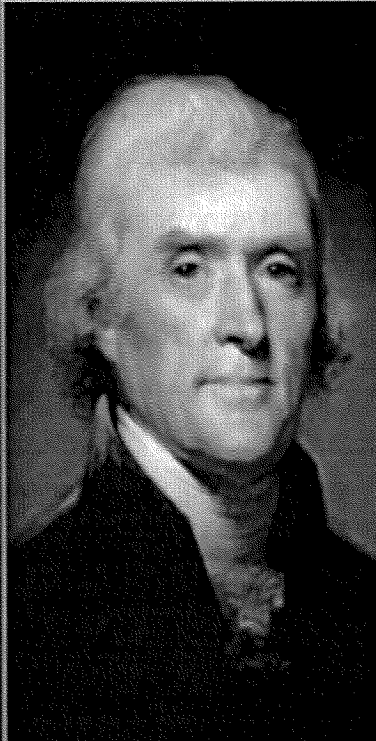

Thank you KFF,

C/c: DC, For Public Distribution

Daniel Cobble, Republican Candidate for U.S. Rep., Louisville Dist. 3

On U.S. banking

"If the American people ever allow private banks to control the issue of their currency, first by inflation, then by deflation, the banks and corporations that will grow up around them will deprive the people of all property until their children wake up homeless on the continent their Fathers conquered . . .

I believe that banking institutions are more dangerous to our liberties than standing armies . . .

The issuing power should be taken from the banks and restored to the people, to whom it properly belongs."

THOMAS JEFFERSON

• Primary election on May 19

ATTACHMENT 1

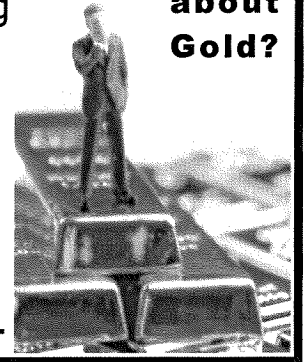

Stopping the three violations below will end the repeat Gov't shutdowns. **As seen in Figure 2 on next page**, prior to 1999, shutdowns did not occur due to "tax surpluses,".

ALSO note that these violations are causing the weak dollar that keeps gold prices rising. Gold prices will return to normal \lower when ending the violations. See Figure 1 (next page).

What about Gold?

A-4. Said three antitrust violations below, for corrections, are as follows:

Violation 1: Reinstate provisions of the Glass-Steagall Act of 1933 that was repealed / terminated in 1999 by President Bill Clinton & the Republican Congress. Since 1933, Glass-Steagall had prevented derivatives and hedge funds traders, etc. from placing bank accounts & other consumer accounts at risk. Reinstating the provisions of Glass-Steagall will end these "free money trades" against consumer accounts to Wall Street, and "once again" allow people to safely deposit their monies into banks and other institutions. Profits from these illicit trades are used to buy-up property (real estate, businesses, stocks & bonds, etc). As illustrated in **Attachment 3** (pg. 9, & pg. 1), **by 2022**, from records of the **Bank of International Standards**, traders have accumulated over **\$1.2 quadrillion** in derivatives contracts (a conservative estimate), and over \$100 trillion in hedge funds contracts from the labor **and** fortitude of the American people.

Violation 2: Reinstate competitive prime interest rate (propose 4.75%; it was 5.46% in booming 1999 economy). When taking office in January 2001, **in each quarter**, Pres. George W. Bush reduced the prime rate by 0.25%. By 2007, the prime rate was **0.25%** (near zero). This "too low rate" reduces economic activity & tax revenues because it chases dollars away from U.S. banks\ **communities** in search of higher rates of \$returns. It discourages banks from lending to "retail consumers & small businesses" **the primary engine of the economy**. Instead, with such low rates, banks earn more from larger "corporate loans." – Here too, ending this cheap money will end Wall Street corporations running around buying-up property (real estate, businesses, stocks & bonds, etc) that drives up prices across the marketplace because it **decreases competition**. (For example, auto insurance keeps \$rising due to the consolidation of insurance companies.)

Violation 3: Stop the illegal Fed loans to investment bankers (Merrill Lynch, Berkshire Hathaway, Vanguard, Black Rock, Etc.). **On May 2, 2008**, then Fed Chairman Ben Bernanke announced that "investment bankers" could now borrow directly from the Fed (then at 0.25%) in violation of the **Federal Reserve Act of 1913 (FRA)**, Section 13, clause 2. Again, **for buying-up property**, every year this practice removes \$trillions from "commercial sector circulation" (the economy) for direct, illegal entry to the "financial sector" (Wall Street corporations). This practice also prevents "dollar monetization." To make-up for these economic losses / transfer of dollars, similar to "too low interest rates," we borrow more from the Fed that then forces constant tax & fee hikes and cutbacks on vital programs. This practice, too, has diminished the U.S. tax base leading ultimately to economic collapse.

UPDATE on Violation 2: In January 2022, the Federal Reserve began reversing the 0.25% "wholesale prime interest rate" to inoperably high rates. By 2024, it reached 8.5% with intent to collapse the economy to enforce outlawing cash. This is the "last straw" for tolerating the Fed, it's primary mission to destroy the prosperity of Americans.

Today, the \$transfer-of-wealth has produced the ocean-of-cash for where cheaper money is traded between companies without the Fed.

B. The Massive Tax Windfall

- \$Restitution: Wall Street owes the \$38 trillion in debt; **not the American People** -
- Bringing down- and normalizing low prices - - The buy gold trap -

B-1. The **Restitution Schedule** in **Attachment 3** from the tort claim lists Restitution **R1** thru **R6** [for payment] to the American people.

Today's \$38 trillion debt began only after the Fed's three antitrust violations began in 1999; **at that time, the U.S. ran \$100+ billion in annual tax surpluses** (refer again to **Figures 1 & 2**). Thus, Wall Street is the sole beneficiary of the debt. **R1**, to **Reverse the 3 antitrust violations**, is the first step to repairing the economy. Again, it will remove the pressures on prices and tax hikes. Prices won't come down, but as **Attachments 1 & 2** show, with Wall Street no longer buying-up everything, prices and taxes will stop climbing. **R3** discussed on page 8 is how we bring down prices to return to affordability in the U.S.

B-2. **The incoming tax windfall:** Also when stopping the violations, besides all Fed dollars once again flowing into the **Commercial Sector** to restore the economy and U.S. tax base, **until the proper tax adjustments are made**, the nation will experience a heavy tax windfall across the entire economy. I.e., for the reasons stated, this windfall will occur at all levels of Gov't (LOCAL, STATE, & FEDERAL).

Attachment 3 Restitution Schedule

Fed. Reserve & Wall Street Damages Restitution to U.S. citizens

From Sept. 20, 2022
perfected tort claim

- 2022 Total estimated derivatives contracts = \$1.2 quadrillion
- 2022 Total estimated hedge funds contracts = \$100 trillion

(Estimates based on 2019 Wikipedia report from Bank of International Standards)
NOTE: \$1 trillion x 1000 = \$1 quadrillion

4 Restitution to Gov't programs & infrastructure: \$70 trillion

5 Restitution per U.S. household for defrauding U.S. Postage Service: \$10,000
(160 million homes = \$1.6 trillion)

6 Restitution divided amongst U.S. households for manufactured COVID crisis: \$30 trillion

Fixing JCPS & Stopping Student Bullying:

For a strong nation, we need successful public schools for reinforcing social skills in our students. We now know it's the global elites preventing successful education in the U.S.

At JCPS and in Chicago, as two examples, PhD educators know that parental & community support is the most powerful stimuli for getting students to learn. It's proven that parents as hall monitors & aides to teachers in classrooms quickly develop winning schools. This is called the **parental-school staff partnership** (PSSP). PSSP also eliminates child bullying.

Mr. Daniel Cobble
220 Casa Bella Court
Louisville, KY 40220

Dear Mr. Cobble:

This will acknowledge receipt and certification of your filing papers and fee in the amount of \$500.00 for the following office:

**US REPRESENTATIVE
3rd Congressional District**

We have enclosed an application and information relating to our online candidate registrar which can be found at <https://web.sos.ky.gov/CandidateFilings/>. We hope that you will consider returning the application for inclusion in the directory.

If our office may be of further assistance to you, please contact our election staff at (502) 564-3490 or you can email SOS.Elections@ky.gov.

Sincerely,
Michael G. Adams

Michael G. Adams
Secretary of State

Enclosures (2)

**HELP GET THE WORD OUT
BEFORE EARLY ELECTIONS**

Though Mr. Cobble (R) polled #1 to win in the 2022 primary race for District 3 U.S. Representative, Circuit Court Judge Patricia Morris is refusing to process civil case 23-ci-6012 to prevent cheating in the May 19, 2026 primary election. **For example**, radio and television are expected again to blackout coverage of the District 3 race. Wherefore, Mr. Cobble must rely on voters for a heavy turnout on May 19. If you don't change your voter registration to the Republican Party, you can help by getting the word out about Mr. Cobble. Do what you can to copy and pass-out this information to others. — *Thank you.*
