	 Construct a flush-mounted sign to be 	
	• Construct a hush-mounted sign to be under 2.5' in height.	
	-	
	 Design a projecting sign to project no more than 5' or half the width of the 	
	sidewalk, whichever is less.	
	Sidewalk, willelievel is less.	

Current Standard Guidelines	Nore' Winter's Draft	Staff Suggestions
SG4 Consider the following issues when installing a sign; its size, shape, and materials; where it will be positioned on the building; if and how it will be illuminated; and what typeface will be used.	 SG.6 Place a sign to be compatible with those in the preservation district. Place attached wall signs over the unadorned frieze of a cornice or along the top of the storefront below the sill of the second-story windows. 	
	 For historic residential buildings, attach a sign near a doorway or on a porch. Consult the Department of Public Works to determine whether a portable sign will be approved. Do not install a free-standing sign where an attached sign will accomplish the same goal. A free-standing sign should be low to the ground and appropriately landscaped. Do not install a marquee on any building other than an operating theater or hotel or another use that traditionally used a marquee. Do not install a roof-top sign or billboard. 	
SG5 Place attached wall signs over the unadorned frieze of a cornice or along the top of the storefront below the sill of the second-story windows. For residences, attach signs near doorways or on porches, where such features exist.	**Incorporated in SG.6**	
SG6 Keep flush-mounted signs under 2.5 feet in height. They should be installed above the display windows and below the second-story window sills. Lettering should be between 8 and 18 inches high and occupy around 65 percent of the sign board.	**Incorporated in SG.3**	
SG7 Install window signs in such a way that lettering does not obscure the display area. The	**Incorporated in SG.7**

SG15 Do not install billboards within a historic	**Incorporated in SG.6**	
district.		
SG16 Use of portable signs may be approved	**Incorporated in SG.6**	
with certain restrictions; however, such a sign is		
subject to a licensing agreement from the		
Department of Public Works		
SG17 Do not install marquees on any building	**Incorporated in SG.6**	
other than an operating theater or hotel.		
SG18 Do not light signs in a harsh manner.	**Incorporated in SG.10**	
Lighting should enable the sign to be easily read,		
but should not be overdone. Concealed		
incandescent lighting is recommended.		
Internally-lit, plastic box signs, bare spot lights,		
or high-wattage metal halide lights are		
inappropriate and should not be used.		
SG19 Place signage in a location that benefits	SG.9 Place signage in a location that benefits	
from existing interior lighting and street lighting.	from existing interior lighting and street lighting.	
Previously not Incorporated	SG.1 Consider history, context, and design when	
	determining whether to retain a historic sign.	
	Retaining a historic sign is especially	
	important when the sign is:	
	 Associated with a historic figure, event, 	
	or place.	
	 Significant to the building or 	
	preservation district, or as evidence of	
	the history of the product, business, or	
	service advertised.	

Current Standard Guidelines	Nore' Winter's Draft	Staff Suggestions
	 Characteristic of a specific historic period. Integral to the building's design or physical fabric. Attached in a way that removal could harm the integrity of a historic property's design or damage its materials. An outstanding example of the sign maker's art because of its craftsmanship, use of materials, or design. Recognized as a popular focal point in the community. 	
Previously not Incorporated	 SG.2 Maintain a historic wall sign whenever possible. Leave a historic painted wall sign, or "ghost sign," exposed wherever possible. Do not over-restore a historic wall sign to the point that it no longer provides evidence of a building's age and original function.
